

Why is this little blue tag so important to you?

Would you trust your project to a bag of seed without this tag?

That's right, that little **Oregon Certified Blue Tag** is your only guarantee that the seed in that bag is the variety/varieties specified and that it is top quality. Without the tag, you could be buying floor sweepings — or worse!

The Oregon Seed Certification program establishes the genetic purity and germination of varieties, blends, and mixtures. The certification process begins with the proper field history before production and continues through the bagging of a seed lot with every step independently verified by Oregon Seed Certification personnel. Each seed lot to be certified is sampled by Certification personnel and tested in the OSU seed laboratory, so the seed you buy is the seed that was tested. If even one standard in this process failed, the lot is uncertified.

Creeping Bentgrass

Tyee, 007, SR 1150, SR 1119, Providence (SR 1019) and SR 1020

Creeping Bentgrass Blends

Dominant X-treme 7, Dominant X-treme, Dominant Southern, Dominant and Dominant Plus

MEMBER OF ASSOCIATION OF OFFICIAL SEED CERTIFYING AGENCIES

Every Seed Research of Oregon variety — blend and mixture — is available as Oregon Certified, because we believe in the certification process. In fact, we produce over 40% of all the certified mixtures approved by the Oregon Certification Department. When you ask for **Oregon Certified Seed**, you can be certain that the seed is genetically pure. Look for the **Oregon Certified Blue Tags** on these and other fine Seed Research of Oregon products. Some products may have certified tags from other states but the same genetic purity is insured.

Perennial Ryegrass Mixtures

Champion Fine, Champion ST (Sports Turf) and Champion EZEE

Fescues

SR 3100 and SR 3150 hard fescue; SR 3210 blue fescue; SR 5100 and SR 5130 Chewings fescues; SR 5210 and SR 5250 strong creeping red fescue; and Dawson and Shoreline slender creeping red fescues
